DETAILED ACTION

Claims 1-13 are pending.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-13, drawn to compound of formula II, IIA, III and IIIA, where X= SO₂ and Y= CO, namely 1,2-thiazin-4-onedioxide dye, classified in class 544, subclass 3 and other classes and subclasses depending upon the choice of D
- II. Claims 1-7, drawn to compound of formula II, IIA wherein X and Y are other than those provided for in Group I, classified in class 544, subclasses 5, 52, 58.2 and other classes and subclasses depending upon the choice of D.

If group II is elected applicants should elect a specific X and a specific Y for examination.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are independent and distinct from each other because they are directed to dissimilar compounds that lack common core namely 1,2-thiazin-4-one dioxide versus 1,4-thiazin-2-onedioxide core versus isomeric thiazinesulfoxide core, and isomeric piperidone core. Consequently, the groups have different classifications and require separate prior art searches. Their method of making and their uses are distinct as evidenced by applicants' specification and several references cited in the Information Disclosure Statement. Art, which may render obvious or anticipate one of the groups

Art Unit: 1624

would not necessarily do the same for the other group. Each can support a patent, as the compounds of each group are capable of being utilized alone not in combination with other members listed in the Markush group. In addition, searching all classes/subclasses, which is a mandatory, would be a serious search burden given limited time available for examination of each application.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions anticipated by the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Sarah Roberts on 4/30/2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

Art Unit: 1624

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
